

# Take-It-Easy Oven™

*portable food warmer*

## Portable Warming Oven for Higher Food Quality

- Lightweight for Convenience
- Designed for Catering Functionality
- Electric Power on the Road
- Lower Delivered Food Cost with Higher Quality

## The Take-It-Easy Oven™ Gives Your Catering Business An Advantage

**F**or foodservice and catering professionals who need to transport heated food, our Take-It-Easy Oven is powered by 12V electric power while on the road or optional 120V electric wall plug. We provide a heated and portable food warmer that weighs 15 pounds and can hold 90 pounds of food in standard commercial trays at 140 to 165 degrees while plugged in.

### CONVENIENCE & QUALITY

Catering and food service professionals know the conditions that their preparations must endure in transit from the kitchen until final presentation. The quality of food at the time of service is the only criteria by which you are judged. Whether delays in service are caused by traffic en route or by the client themselves, your reputation for quality can be sustained with quality equipment.

The Take-It-Easy Oven better

maintains food temperature with patented carbon fiber heating filaments that help distribute heat evenly. Total surround heat means no more cold spots and no burning. The Take-It-Easy Oven draws only 100 watts of electricity and is powered by a 12V automotive plug or a 120V wall plug (optional).

Vehicle loading and unloading are the only times the Take-It-Easy Oven will not have power. The thermal insulation provided by the durable polymer shell retains heat and results in less weight for staff to load and unload.

### FORM FOLLOWS FUNCTION

The Take-It-Easy Oven serves as a food carrier in transit and a warming oven while on site. Custom graphic options give your brand visibility and help drive word-of-mouth advertising for your business. Whether your clients' events are indoors or outdoors,

the Take-It-Easy Oven's design will better maintain food temperature and help you deliver the quality your clients expect. Its versatility and light weight will delight you and your employees.

### TOTAL COST OF OWNERSHIP

The Take-It-Easy Oven draws only 100 watts of power and does not require additional preparation or consumables, which can cost your business money. The low energy consumption of the Take-It-Easy Oven adds value to your business every time you plug it in.

# Take-It-Easy Oven™

*portable food warmer*

- Lightweight for Convenience
- Designed for Catering Functionality
- Electric Power on the Road
- Lower Delivered Food Cost with Higher Quality

**F**or foodservice and catering professionals who need to transport heated food, our Take-It-Easy Oven provides a portable and energy efficient warming oven, powered by 12V electric power while on the road or an optional 120V electric wall plug. We provide a heated and portable food warmer that weighs 15 pounds and can hold 90 pounds of food in standard commercial trays at 140 to 165 degrees – indefinitely – while plugged in.

## **The Take-It-Easy Oven Gives Your Catering Business an Advantage**

- Lightweight—weighs only 15 pounds empty and can carry up to 90 pounds of food.
- Portable – can plug into car or wall (optional adaptor) to maintain temperature between 140 and 165 degrees. Acts as insulated carrier while unplugged.
- Patented heating technology—keeps hot food hot, with no more burning, no more cold spots.
